What is Claude Fable 5?

It is a Mythos-class model, the tier above Opus, now made safe for general use. Anthropic describes it as state-of-the-art on nearly every tested benchmark of AI capability.

The longer and more complex the task, the bigger Fable 5's lead over previous models.

Performance areas:

- ◆ Software engineering
- ◆ Knowledge work and finance
- ◆ Vision and image understanding
- ◆ Scientific research
- ◆ Long-context reasoning

What does Fable 5 do in the real world?

CROSBY

“

Claude Fable 5 feels materially different. In blind review, our lawyers found its redlines matched or beat our current model every time.

Aveek Duttagupta
Member of Technical Staff

CURSOR

“

Claude Fable 5 is the state of the art model on CursorBench. It's opened up a class of long-horizon problems that were out of reach for earlier models.

Michael Truell
CEO and Co-founder

Rakuten

“

At the highest effort, Claude Fable 5 reflects on and validates its own work. For us, that's what makes highly autonomous operations possible — the extra thinking pays for itself.

Yusuke Kaji
GM, AI for Business

WALLEYE

“

Claude Fable 5 delivers more capable engineering in fewer turns than prior models — handling the complex multi-agent workflows our employees run daily in Claude Code.

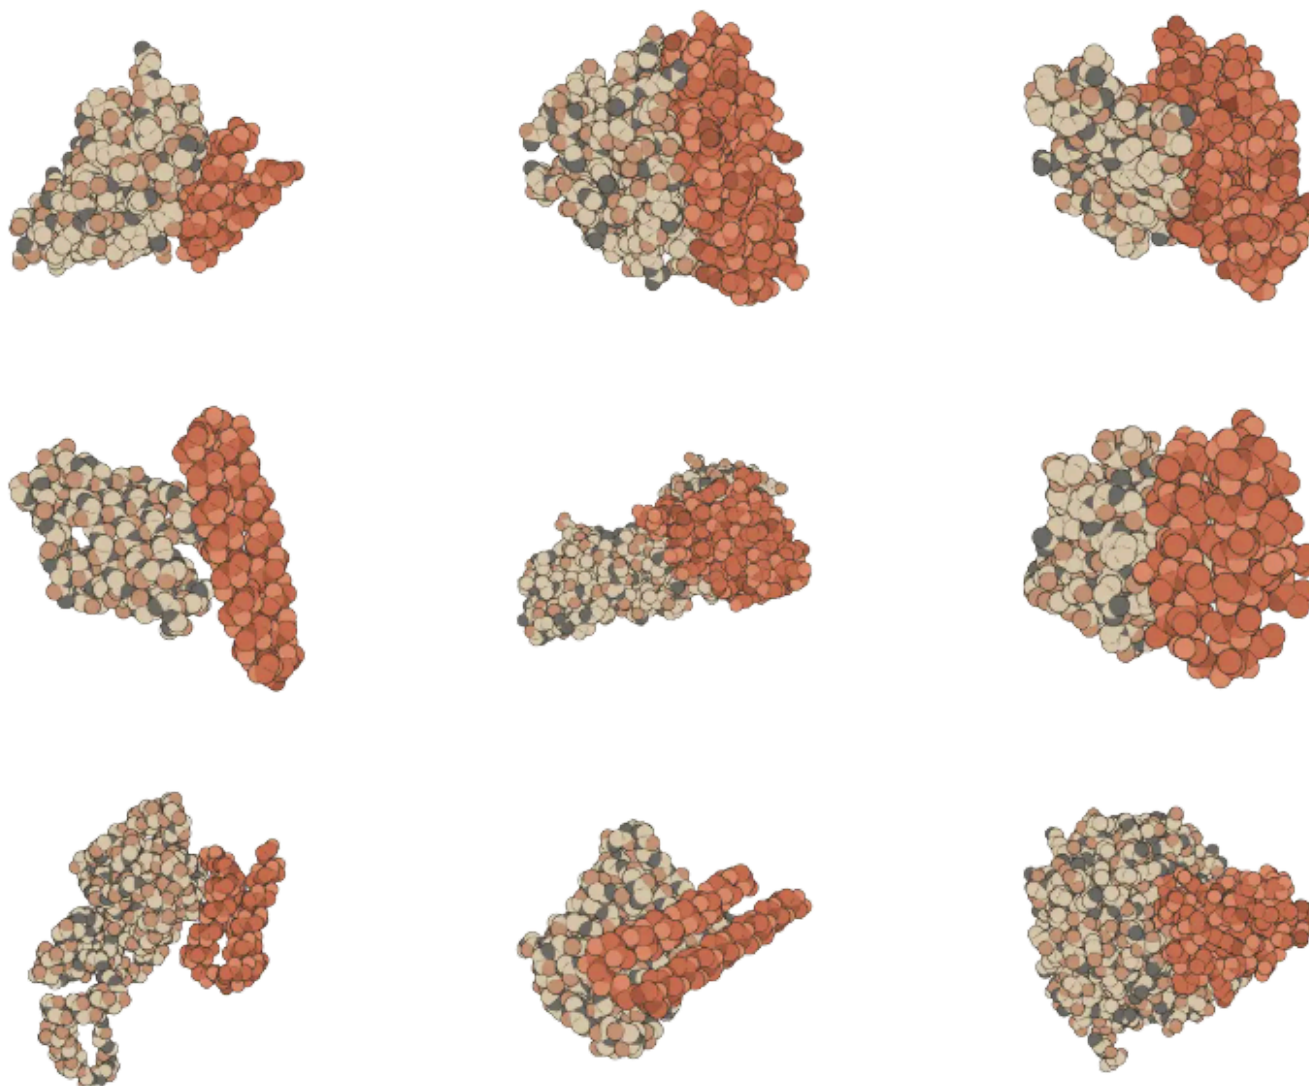

Luke Anderson
CTO

It sees. It remembers. It plays Pokémon.

- ◆ **Vision:** Fable 5 can rebuild a web app's source code from screenshots alone, with no additional tools
- ◆ **Memory:** In long-running tasks, it improves its own outputs using persistent notes
- ◆ **Long-context:** It stays focused across millions of tokens
- ◆ **Games:** It beat Pokémon FireRed with vision only. No maps, no helper harness. Earlier Claude models needed scaffolding to attempt the same.

Fable 5 is doing real science.

Mythos 5 accelerated drug design by 10x. Across 14 protein targets, it worked without human assistance and produced strong drug candidates for 9 of them. It also ran over a week of autonomous genomics research and trained a custom ML model that outperformed one published in Science, at 100 times smaller size.

Fable 5 vs Mythos 5

Claude Fable 5

Mythos-class capabilities with safeguards on cybersecurity, biology, and model distillation. Available to everyone today

Claude Mythos 5

Same underlying model, cyber safeguards lifted. Available only to Project Glasswing partners (cyberdefenders, critical infrastructure) and select biology researchers.

Fable comes from the Latin fabula, "that which is told," related to the Greek mythos. The safeguards are what distinguish the two. The names reflect that.

How to access Claude Fable 5

- ◆ Claude API: Use the model string claude-fable-5. Available on consumption-based Enterprise plans from today
- ◆ Claude apps: Included at no extra cost on Pro, Max, Team, and seat-based Enterprise plans through June 22
- ◆ Cloud platforms: Available on AWS, Google Cloud, and Microsoft Foundry

Pricing: \$10 per million input tokens and \$50 per million output tokens. Prompt caching cuts input costs by up to 90%.
